SUMMARY

DevOps Engineer with 4 years of professional experience in Azure cloud automation, CI/CD, observability, release management, and infrastructure as code. Skilled in Azure DevOps, Terraform, Azure Automation, Azure Key Vault, PowerShell, GitHub Actions, Docker, React.js, Python, Swagger/OpenAPI, and REST APIs. Delivered automation initiatives that reduced manual effort by 60%, improved deployment reliability, and enabled 100% SLA adherence for enterprise cloud platforms.

KEY ACHIEVEMENTS

- Reduced manual operational effort by 60% through Azure DevOps automation and certificate lifecycle management.
- Maintained >99% deployment success rate across major releases and high-frequency production changes.
- Enabled 100% SLA adherence through automated monitoring, incident management, and reporting workflows.
- Delivered enterprise-scale certificate lifecycle automation using Azure DevOps and Azure Key Vault.
- Awarded the "Geek Award" at Bosch Global Software Technologies for technical excellence.

TECHNICAL SKILLS

Cloud Automation & DevOps: Microsoft Azure (PaaS, IaaS), Azure Key Vault, AWS, AWS RDS, AWS API Gateway, Azure DevOps, GitHub Actions, Azure Automation, Azure Monitor

Infrastructure as Code: Infrastructure Provisioning, ARM templates, Bicep templates, Terraform, YAML-based automation

CI/CD, Production Support & Release Management: CI/CD pipeline design, build/test/deploy automation, release management, production support, Git, Azure Repos

Scripting & Automation: PowerShell, Python, Azure Automation Runbooks, Power Automate, certificate lifecycle automation, Azure AD access governance

Full-Stack Development: React.js, Python backend/API development, REST API design/integration, Swagger/OpenAPI, responsive UI development

Observability, Containers & Reporting: Azure Functions, Log Analytics, Application Insights, Docker, Kubernetes, Nginx, SQL, Power BI dashboards

WORK EXPERIENCE

DevOps Engineer and Full Stack Developer - Bosch Global Software Technologies

Nov 2025 - Present

- Engineered and maintained CI/CD pipelines using GitHub Actions for automated build, test, and deployment workflows targeting AWS cloud environments, reducing manual release overhead.
- Architected and managed Azure cloud infrastructure using Terraform (IaC), automating environment provisioning, release pipelines, and operational configuration across multiple Azure resources in Azure DevOps.
- Provisioned and managed AWS RDS for persistent data storage and exposed backend APIs through AWS API Gateway, enabling secure and scalable data ingestion and retrieval.
- Designed and maintained containerized application environments using Docker, configured Nginx reverse proxies, and supported API Gateway integrations to ensure secure and reliable application communication.
- Integrated Swagger/OpenAPI specifications into REST API development, improving contract clarity, enabling faster onboarding, and strengthening cross-team collaboration.
- Troubleshoot application deployment, networking, and reverse proxy issues across containerized environments, ensuring reliable application delivery.
- Drove resolution of cross-functional integration issues by collaborating across DevOps, development, and cloud operations workstreams, supporting parallel delivery across multiple projects.
- Contributed full-stack development capacity on a concurrent project, building React.js front-end components and Python-based backend APIs alongside core DevOps responsibilities.

DevOps Engineer - Bosch Global Software Technologies

Jun 2023 - Oct 2025

- Worked closely with cross-functional module owners to validate dependencies and ensure successful end-to-end deployments in complex environments.
- Automated certificate lifecycle management across Azure resources using Azure DevOps pipelines and Azure Key Vault integrations, reducing manual intervention by 60% and minimizing service disruption risks.
- Oversaw major releases and multiple high-frequency change deployments, ensuring >99% deployment success rate and on-time delivery aligned with organizational release practices.
- Developed and maintained automation solutions using PowerShell and Azure DevOps, reducing operational effort and improving deployment consistency across environments.
- Automated Azure AD group provisioning and access governance through Azure DevOps pipelines, improving compliance, auditability, and operational efficiency.
- Supported production-critical incidents and deployment issues, collaborating with cross-functional teams to restore services, perform Root Cause Analysis (RCA), and ensure business continuity.
- Partnered with Renault-Nissan Alliance (RNA) stakeholders and delivered technical knowledge transfer sessions covering CI/CD processes, deployment workflows, and operational best practices.
- Worked with ARM and Bicep templates for Infrastructure as Code (IaC).

Incident & Monitoring Engineer - Bosch Global Software Technologies

Sep 2022 - May 2023

- Developed Power Platform solutions using Power Automate and Power BI to automate operational processes and provide real-time reporting dashboards for SLA and team performance tracking.

- Developed automation solutions using PowerShell, Azure Automation, and Power Automate, significantly reducing manual workload and contributing to 100% SLA fulfillment.
- Automated incident triaging, Azure DevOps work item creation, and certificate lifecycle management, reducing manual operational effort across monitoring activities.
- Enhanced platform observability through Azure Monitor, Log Analytics, custom Azure Function App-based alerting, and automated monitoring workflows.
- Designed and maintained Azure Automation Runbooks for operational workflows, incident response automation, and infrastructure management.
- Supported production-critical incidents, conducted RCA, and drove continuous improvement in monitoring and alerting workflows.
- Helped diagnose and resolve issues in Azure Function Apps and Automation Runbooks, improving reliability and reducing downtime in alerting and automation processes.

IoT Developer Intern - Bosch Global Software Technologies

Feb 2022 -

- Contributed to initial planning and design of a Smart Mirror project, defining system components and user interaction flow.
- Used Flask during early development to visualize outputs and test core logic.
- Assisted in developing the Smart Mirror by integrating Natural Language Processing (NLP) and Computer Vision for real-time voice and gesture-based feedback.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering - Lovely Professional University | Jul 2018 - Jul 2022

- Specialized in MERN stack (MongoDB, Express.js, React, Node.js) for full-stack web development.
- Built a strong foundation in software engineering, cloud computing, and automation.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

Microsoft Certified: Azure Administrator Associate (AZ-104)

AWARDS & ADDITIONAL INFORMATION

- Received multiple recognitions for impactful automations that reduced manual effort and enhanced operational efficiency.

Languages: English, Hindi
